

Deck Fittings

**Specifically for
High-Performance Softlines**

Markey engineers have long known that indirect towing maneuvers can produce snap load forces near the breaking strength of modern synthetic lines. What we don't know is why so many work boats are still using poorly-designed, low-quality fittings that accelerate wear on highly loaded lines that reduce their service life and drive up operating expenses. Markey's "Hell-for-Stout" durability, reliability, and quality make Markey deck fittings the right choice for working vessels of all types.

SPECIFICATIONS

- ◆ BULLNOSE FITTINGS
- ◆ BOW AND STERN STAPLES
- ◆ BLOCKS AND SHEAVES

Working surfaces are high-quality cast 316 stainless steel, polished to near mirror finish. Stock designs are available to suit lines in the 7 and 10 (+/-) inch circumference range of high-performance softline. Custom designs also available.
